## the nando's method ...

- Memorise your table number – you may be tested later.
- Decide how spicy you want your food:
  - Lemon and Herb:** for the sensitive palate
  - Medium:** you're getting warmer
  - Hot:** caution and respect required
  - Extra Hot:** handle with extreme care

- Stride confidently to the counter, place your order and pay. When it's ready we'll bring your food to your table before you can say boo to... a chicken.
- Choose your sauce from the fine array and get tooled up. Cutlery and plates may be useful, although using your hands won't be frowned upon. What are a few sticky fingers between friends after all?
